

National Co. with headquarters in KC gets Enterprise level access in 5 states

❌ PROBLEM:

Nation's 3rd largest chocolate manufacturer needs to expedite access for employees during shift changes at various manufacturing facilities while maintaining administrative control from the main headquarters in Kansas City.

✅ KENTON SOLUTION:

With 11 manufacturing and distribution centers located throughout the country, an enterprise level, expandable S2 access control system capable of global system administration controlled from the headquarters in Kansas City was prescribed; additionally, the newest technology from Alvarado in turnstile's allows for speedy ingress and egress at each facility during shift changes, and new electronic hardware will ensure proper functionality.

✅ RUSSELL STOVER CANDIES:

"My mama always said, life is like a box of chocolates, you never know what you're gonna get." When Tom Hanks uttered this famous line from the park bench in Forest Gump, he was holding a box of Russell Stover chocolates.

Founded in 1923, by Clara and Russell Stover in Denver, Co, Russell Stover's candies has grown to be the 3rd largest manufacturer of chocolate in the United States. Headquartered in Kansas City, the company has 11 manufacturing and distribution facilities in 8 different states across the US.

Wanting to better serve it's employees by providing rapid access to each of the companies nationwide facilities, Russell Stover's came to Kenton Brothers for a solution. KB proposed installing Alvarado optical turnstiles integrated with S2 access control and global site management

Russell Stover's got access control in 5 states with expansion capabilities for all 8.....each one controlled from KC!

administered from Russell Stover's headquarters in Kansas City.

The Alvarado SU5000 optical turnstiles have a compact footprint; 1/1000 second response time on opening; and allow for stacking of credentials, meaning the panels remain open for the next users' passage. Barriers open away from the user in the same direction of travel, and illuminated status icons prompt users or alert security to various alarm conditions.

S2 Security's Enterprise solution provides for integration with the Alvarado turnstiles, HID readers, and cameras installed by Kenton Brothers in the Texas, Missouri, Colorado, and Florida locations. Built on S2 NetBox IP-based security management technology, Enterprise can be operated entirely from a Web browser bringing enterprise-grade capabilities to larger, multisite organizations and allowing for expansion to the facilities in Tennessee, Nevada, and Virginia.
