The Kenton Brothers Bank Security Solution

IP Video Surveillance Take advantage of the network already in place to connect IP video surveillance. Strategic installation offers a clear view of people and grounds. A variety of optional features can provide you with solutions such as forensic-grade capturing to export features that safeguard evidence.Surveillance systems monitor activity and deter would-be criminal acts.

Unified Access Control & Video Surveillance Assign levels of building and area access based on job function with an access control system. Paired with video surveillance, it allows for active facility monitoring and recording suspicious activity. Integrating access control and video provides centralized control for easy administration and management. Metal detection can be combined with both or individually to prevent armed robberies.

Panic & Duress Notification Systems Give employees in danger of being held up the power to alert bank managers and summons help from first responders with the press of a button.

Bill Traps Bait bill traps in cash drawers with currency to give tellers and employees a way to trigger a silent alarm and/or other security devices simply by removing the last bill in the trap.

Vaults Safeguard money, valuables, records and documents with state-of-the-art dual authentication vault systems.

Time Locks Prevent access to money in vaults or other high-security containers between specified time periods, such as closing to next day's opening time.

Intrusion Detection Systems Receive recommendations for the newest options in defense devices, which are carefully evaluated based on your financial institution's needs and layout.

Seismic Sensors Covertly detect an intrusion of safes, vaults or other areas with seismic sensors that measure intensity and duration of sound, touch or vibration.

Installation & Support: New Construction or Systems Upgrade Work with a security solutions provider with a strong commitment to service. From upgrading legacy systems to providing remote support during a critical systems issue, you need a reliable and responsive partner, like Kenton Brothers.
