

COBALT

Innovation Program

Organizations can thoroughly evaluate a security robotics initiative within their environment with the Cobalt Innovation Program.

- A six-month term
- Two robots
- All hardware and software upgrades
- Full service and maintenance
- White glove implementation to support cultural acceptance and change agency
- Technology and cyber program integration
- Sensor and software use case testing
- Guard force collaboration and SOC integrations
- Exploration of integrations for multi-floor coverage
- Full Cyber and PII review with Cobalt engineering team
- Review and customization of reports and BI applications

To get started, we work with you to:

-  determine your robot's patrol route
-  establish security escalation procedures
-  introduce Cobalt's robot and Specialists to your employees
