Cobalt for Worksite Safety

Worksites with a high risk for injury need ongoing visibility for immediate and effective action. Whether we're ensuring safety equipment and protocol compliance or addressing issues as they arise, Cobalt provides modern organizations a new tool to enhance safety operations.

By pairing onsite robots with a remote Specialist Command Center, we deliver unmatched situational awareness, ensure accountability and provide real-time support whenever needed. The Cobalt service safeguards your personnel and your worksites so you can focus on other things that matter.
